**Treat your boat to some new electronic wizardry**  
5/14/2018

With the boating season just getting underway in some parts of the country, many of you are thinking about investing in new equipment, including electronics. Your interest isn't lost on manufacturers, who pummel publications like Marine Electronics Journal with information on their latest widgets. Here's a sampling:

### Commercial display combines quality and value

Green Marine Monitors has launched the Pilot-19 monitor for the commercial/work boat market. The company's first low-cost pilot house-only monitor features a sunlight-readable 19 inch display that delivers impeccable picture quality at a great value.

Designed with everything you need and nothing you don't, the PILOT-19 monitor strikes a balance between capability and cost. Features include: 800 nits sunlight viewable, dimming control knob (dim to black), two signal inputs (VGA & DVI), low-power LED backlights, VESA mounting for 75 and 100mm, anti-reflective cover glass, and 9-36V DC isolated power supply.

### Waterproof display housings fit all major brands

NavPod's new line of high-quality waterproof housings for marine electronics, PowerPods with RAM Mounts, can be installed on a sloping dash or vertical bulkhead.

PowerPods are better than bracket mounting. Very sturdy and secure, yet clean and attractive, these mounts provide protection for fishfinder/chartplotters from the harshest of wet boating conditions. PowerPods give the convenience of easily reaching and controlling a multifunction display while providing added security with protection from theft. NavPods' unique stainless steel tamperproof fasteners and the RAM Mounts' Pin-Lock security system are combined to allow boaters to leave electronics on board the boat without worry. All NavPods are manufactured with a double gasket system that provides an excellent watertight seal.

RAM Mounts are designed with a patented rubber ball and socket system that allows precise positing of your fishfinder or chartplotter. NavPods are available in pre-cut models compatible with all 7, 9, 10 and 12 inch LCD displays from all major marine electronics manufacturers.

### Fugawi.com charts now available on OpenCPN

Under an agreement with OpenCPN, Fugawi.com is making its library of downloadable raster charts available to OpenCPN software users worldwide. This provides the over quarter million OpenCPN ([opencpn.org](http://opencpn.org)) users charts from [fugawi.com](http://fugawi.com) for navigation on their Microsoft, Linux, Mac and Android devices.

OpenCPN is a free and collaborative software that has been providing boaters with S-57 and S-63 support for the official ENC's, RNC's, and various other formats, facilitated by the integrated chart downloader. This new collaboration adds an extensive array of quality raster charts, such as those produced by Canadian Hydrographic Service, nv charts, Delius Klasing, Solteknik and other popular chart brands.

- Verified Super Clean Code
- Open Source
- Developed by Boaters
- Backward Sictent
- Updated Regularly
- Loaded with Features
- Its Free Software

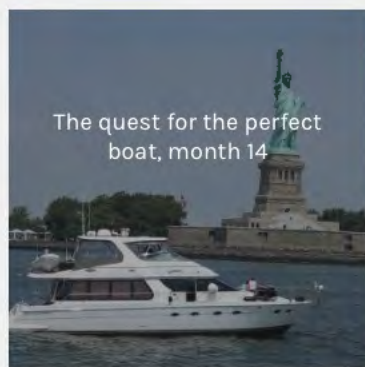

OpenCPN says over the past decade it has developed and supported a robust software with route planning and real time navigation, AIS, anchor alarm, GRIB weather and many other features and plug-ins. With S-57 support

## NavPod Expands Range of Product Offerings

• PUBLISHED MAY 8, 2018 • UPDATED MAY 8, 2018

**PowerPods and PedestalPods Now Available for All Major Marine Electronics Manufacturers**

**Bend, Ore.** – NavPod, the leading manufacturer of waterproof housings for marine electronics, announced today there is a NavPod for every chartplotter and fishfinder available in the industry. The company now offers over 1000 precuts to fit multifunction displays from all major marine electronic manufacturers. The complete product line includes the latest releases such as the Lowrance HDS Carbon, Raymarine Axiom Pro, Humminbird SOLIX and Garmin's 42x Series.

Ideal for inland fishing and offshore power boat installations, PowerPods are better than bracket mounting. Very sturdy and secure, yet clean and attractive, this mount protects fishfinder/chartplotters from the harshest of wet boating conditions. PowerPods feature a swivel base, incorporate stainless steel tamperproof screws providing added security from theft, and are available in high gloss white or carbon fiber finish.

Nice! Signal K gets a major

PedestalPods, designed for the bow of inland fishing boats, conveniently positions displays 20-inches off the deck at a 45-degree angle for ease of viewing while fishing. This allows anglers to easily reach and access the fishfinder/chartplotter for changes to range, zoom or even to control the trolling motor.

Designed to resist impacts, vibration and moisture ingress, PowerPods and PedestalPods are crafted with a thick gauge, UV-stable acrylic capped ABS material and are built specifically with structural rigidity in mind. Like all NavPods, they are also manufactured with a double gasket system that provide an excellent watertight seal to keep spray off electrical connections ensuring the reliability and longevity of marine electronics. PowerPods and PedestalPods are also available with RAM Mounts to provide additional versatility and an almost infinite number of mounting options for compatibility with all kinds of vessels.

"We are proud to give boaters the ability to choose the latest multifunction displays from all of the major marine electronics manufacturers without compromising on the unparalleled protection our NavPods offer," said Rob Walsh, president and owner, Ocean Equipment. "As chartplotters and fishfinders are released from top manufacturers of marine electronics, we continually expand our product line to accommodate the new models. NavPods offer boat owners the security and convenience they need to ensure their investment is well taken care of for years to come."

NavPod backs its commitment to quality by offering a 10-year warranty on all Gen3 NavPods. PowerPods and PedestalPods can be purchased through a nationwide network of marine electronics dealers, national retailers and wholesale distributors. For more information on NavPod's wide range of mounting solutions for inland fishing, offshore power and sailing, please visit [www.navpod.com](http://www.navpod.com).
