PowerPod - 20 Degree Angle

PowerPods provide the clean look and security of flush mounting with the advantages of a swivel base.

All NavPods are manufactured with a double gasket system that provides an excellent watertight seal. Protect your fishfinder/chartplotter from the harshest of wet boating conditions and assure reliability and longevity of your marine electronics. Pre-Cut models are available for 7"-16" LCD displays.

Raymarine

PowerPods are available in high gloss white and Carbon Series.

PowerPod with RAM Mounts®

PowerPod with RAM Mounts combines the protection of a NavPod with the mounting flexibility of RAM Mounts.

PowerPod with RAM Mounts can be mounted on practically any surface angle. Whether it be a vertical bulkhead or off to the side of the console, the choice of mounting options is endless.

NavPod's unique stainless steel tamperproof fasteners and the RAM Pin-Lock security system or key lock knob are combined to allow you to leave electronics on board without worry. Pre-Cut models are available for 7"-12" LCD displays.

PowerPod with RAM Mounts incorporate the large 2.25" rubber "D" size balls, two cable manager base platforms and the RAM-D-201U-C arm. The Hi-Torq wrench is also included. RAM Mounts are designed with a patented rubber ball and socket system that allows precise positioning of your fishfinder/chartplotter.

PedestalPod - 45 Degree Angle

PedestalPod 45 degree positions your fishfinder/chartplotter at a 45 degree angle and 20" off the deck at an easy-to-reach height.

PedestalPods allow you to easily reach and access the fishfinder for changes to range, zoom or even control the trolling motor. PedestalPods provide protection of your fishfinder/chartplotter from the harshest of wet boating conditions.

The heavy-duty, powder coated aluminum pedestal tube is 3" in diameter with a 5" round base and has a large 1.75" opening. Pre-Cut models are available for 7"-10" LCD displays.

PedestalPod - 70 Degree Angle

PedestalPod 70 degree incorporates a swivel mount for precise viewing position.

This heavy-duty, powder coated aluminum pedestal tube is 4" in diameter with a 6.5" round base. It has a large 1.75" opening that provides plenty of room for running wires and connectors internally for a very clean look. Wires and electrical connectors are protected from water intrusion, UV exposure or damage from just getting kicked or snagged. Pre-Cut models are available for larger 10" through 16" LCD displays.

PedestalPod with RAM Mounts is for mounting the fishfinder at the bow.

Mount your fishfinder/chartplotter at an easy to reach 20" off the deck while providing an infinite number of ways to position and view your electronics. This allows the user convenient access to the display for changes to range and zoom or control the trolling motor. The PedestalPod with Ram Mounts will fold down to 10" when not in use. Pre-Cut models are available for 7"-12" LCD displays.

PedestalMount

PedestalMount is for positioning the fish finder off the deck for protection and convenience while providing tilt and swivel functionality.

The operating convenience of tilt, swivel and added height combined with the protection for wires surely make the PedestalMount a great addition to many sportfishing boats.

The PedestalMount is for mounting the fish finder near the bow. The fishfinder's trunnion bracket is to be mounted onto the top bracket of the PedestalMount. The top bracket has predrilled mounting holes that match up to the trunnion bracket. The heavy-duty powder coated aluminum pedestal is 4" in diameter with a 6.5" round base. All wires and connections are routed internally through the pedestal base for protection.
